2019 Impact Report

Team4Tech advances the quality of education for underserved learners around the world through technology solutions and capacity building.

DEAR FRIENDS,

Thanks to our generous donors, corporate partners, and their employee volunteers, Team4Tech continues to grow our impact. Over the past seven years, we have helped 25 nonprofit organizations in 18 countries improve educational opportunities for 65,000 underserved learners through technology solutions and capacity building.

We select innovative local nonprofit partners with strong education programs and help amplify their impact through technology grants and pro bono consulting. Our ultimate goal is to advance progress on the United Nations Sustainable Development Goal 4.4: to substantially increase the number of youth and adults who have relevant skills — including technical and vocational skills — for employment, decent jobs, and entrepreneurship.

Our Approach

We have continued to build long-term partnerships with nonprofit organizations who have progressed along our skills roadmap — helping teachers and students build digital literacy skills; integrating educational technology to accelerate math, science and literacy learning; and developing lifelong learning skills such as creative problem solving, critical thinking, and collaboration through coding, making, robotics, and other project-based learning activities. Our approach is based on research that shows that the combination of teacher training and educational technology used for interactive learning and authentic applications can have a significant positive impact on learning outcomes.

Success Stories

Our work with the nonprofit Kidspire Vietnam is one example of how we have expanded educational opportunities through long-term partnership. Kidspire works to improve education and employment outcomes for children growing up in state-run orphanages in Vietnam, through after-school technology classes and leadership programs. Over the past five years, Team4Tech has contributed more than \$100,000 in technology grants and \$1M in pro bono services to help Kidspire build two new innovation labs for their students, launch both a maker program and a career readiness program, and continually improve their technology curriculum through human-centered design. As a result, Kidspire students are now staying in school longer and getting better jobs.

In 2019, Team4Tech also built on our five-year partnership with LEAP Science and Maths Schools in South Africa to support the launch of their first robotics club — and the team won third place in their first regional competition. 72% of LEAP students attend university, compared to less than 5% of black South African students nationally.

As more and more nonprofit organizations become aware of the impact of Team4Tech projects, the number of applicants for our support is growing. In 2019, we saw a five-fold increase in the number of applicants, 20% of whom we were able to add to our portfolio for the coming year. We are continually refining our partner selection process to invest in organizations with systemic influence, who can scale successful models across their educational ecosystem.

Please help us continue to grow our support for these remarkable community education organizations, as we work towards achieving our goal of making a significant difference for 100,000 underserved learners around the world by 2023.

SINCERELY,

JULIE CLUGAGE **LILA IBRAHIM**

Co-Founder and
Executive Director

Chair of the Board

Team4Tech Skills Roadmap

Team4Tech projects are catalysts for our nonprofit partners. We engage in three- to five- year collaborations with established, high-performing nonprofits, ensuring that our projects lead to sustainable impact. The goal is to improve educational outcomes for learners along our skills roadmap as the nonprofits build capacity.

DIGITAL LITERACY SKILLS

Build digital literacy skills to become confident using technology.

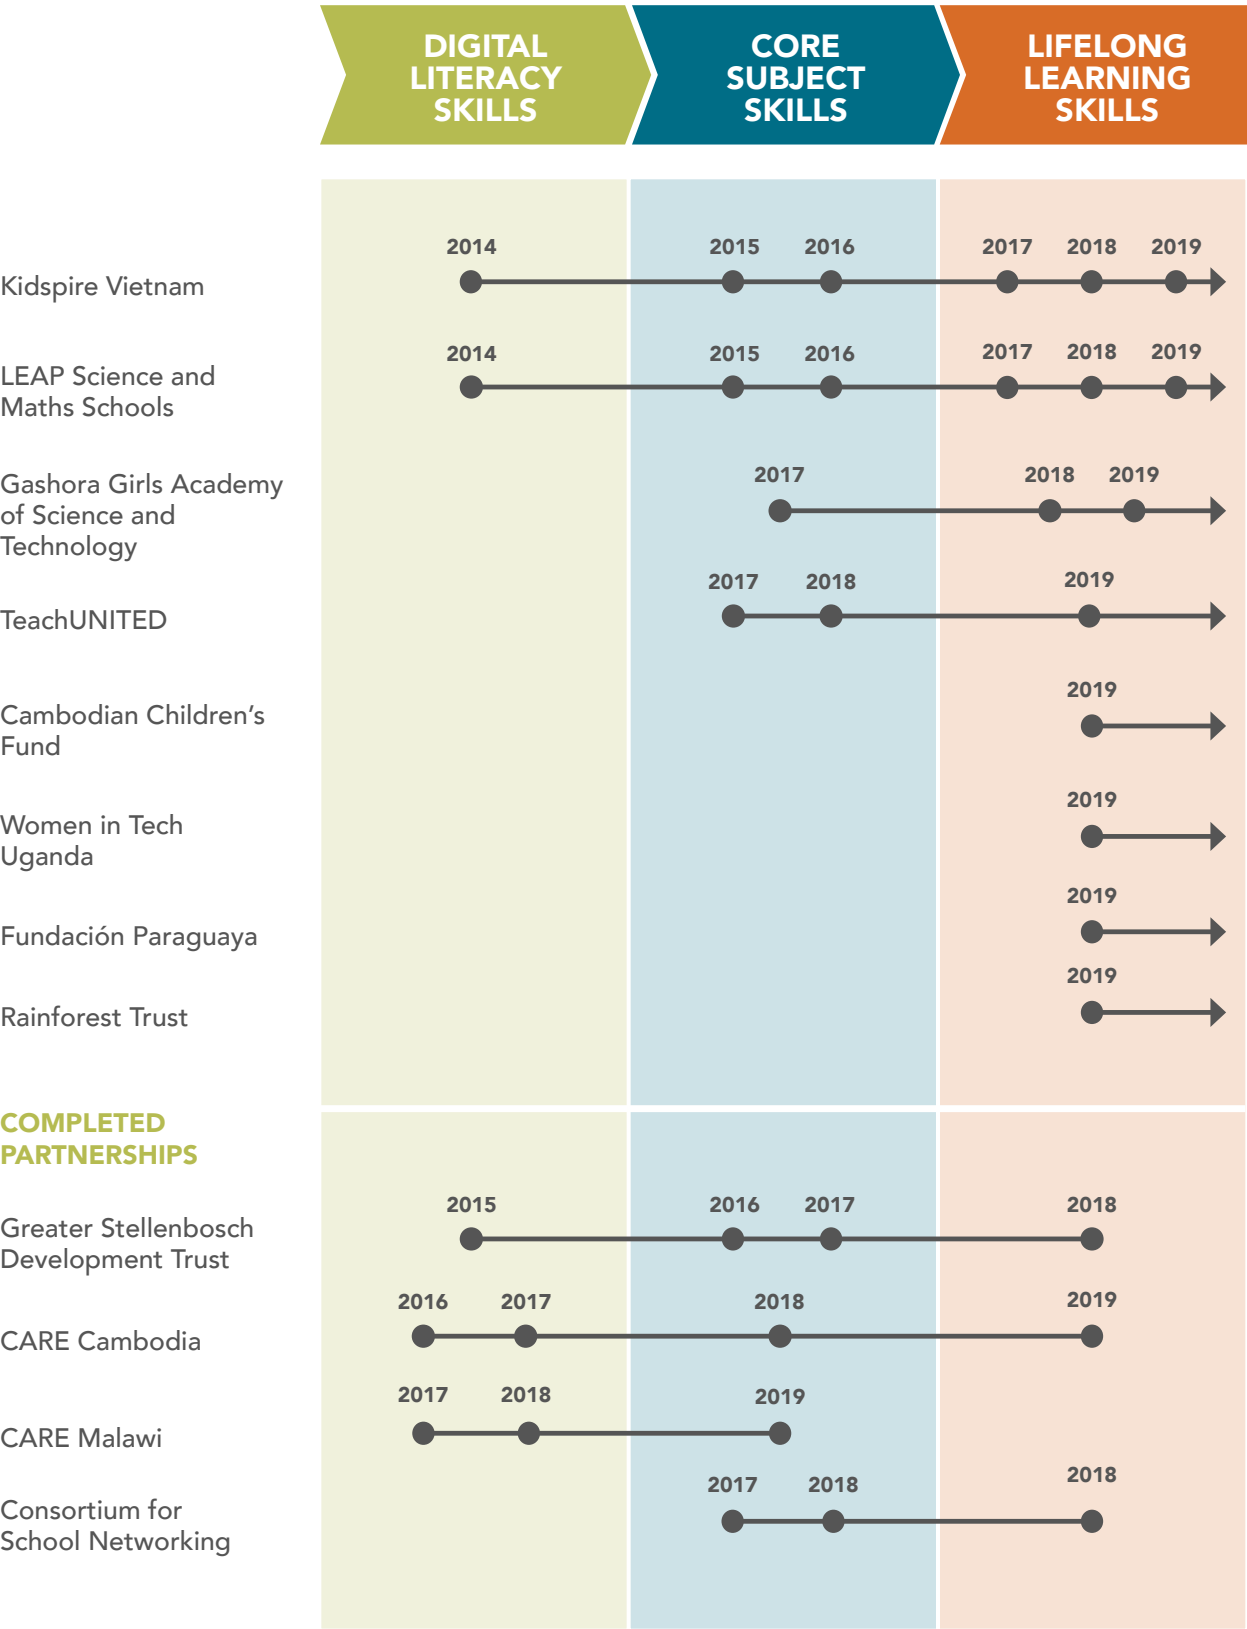

CORE SUBJECT SKILLS

Integrate educational software into teaching and learning to improve math and literacy skills.

LIFELONG LEARNING SKILLS

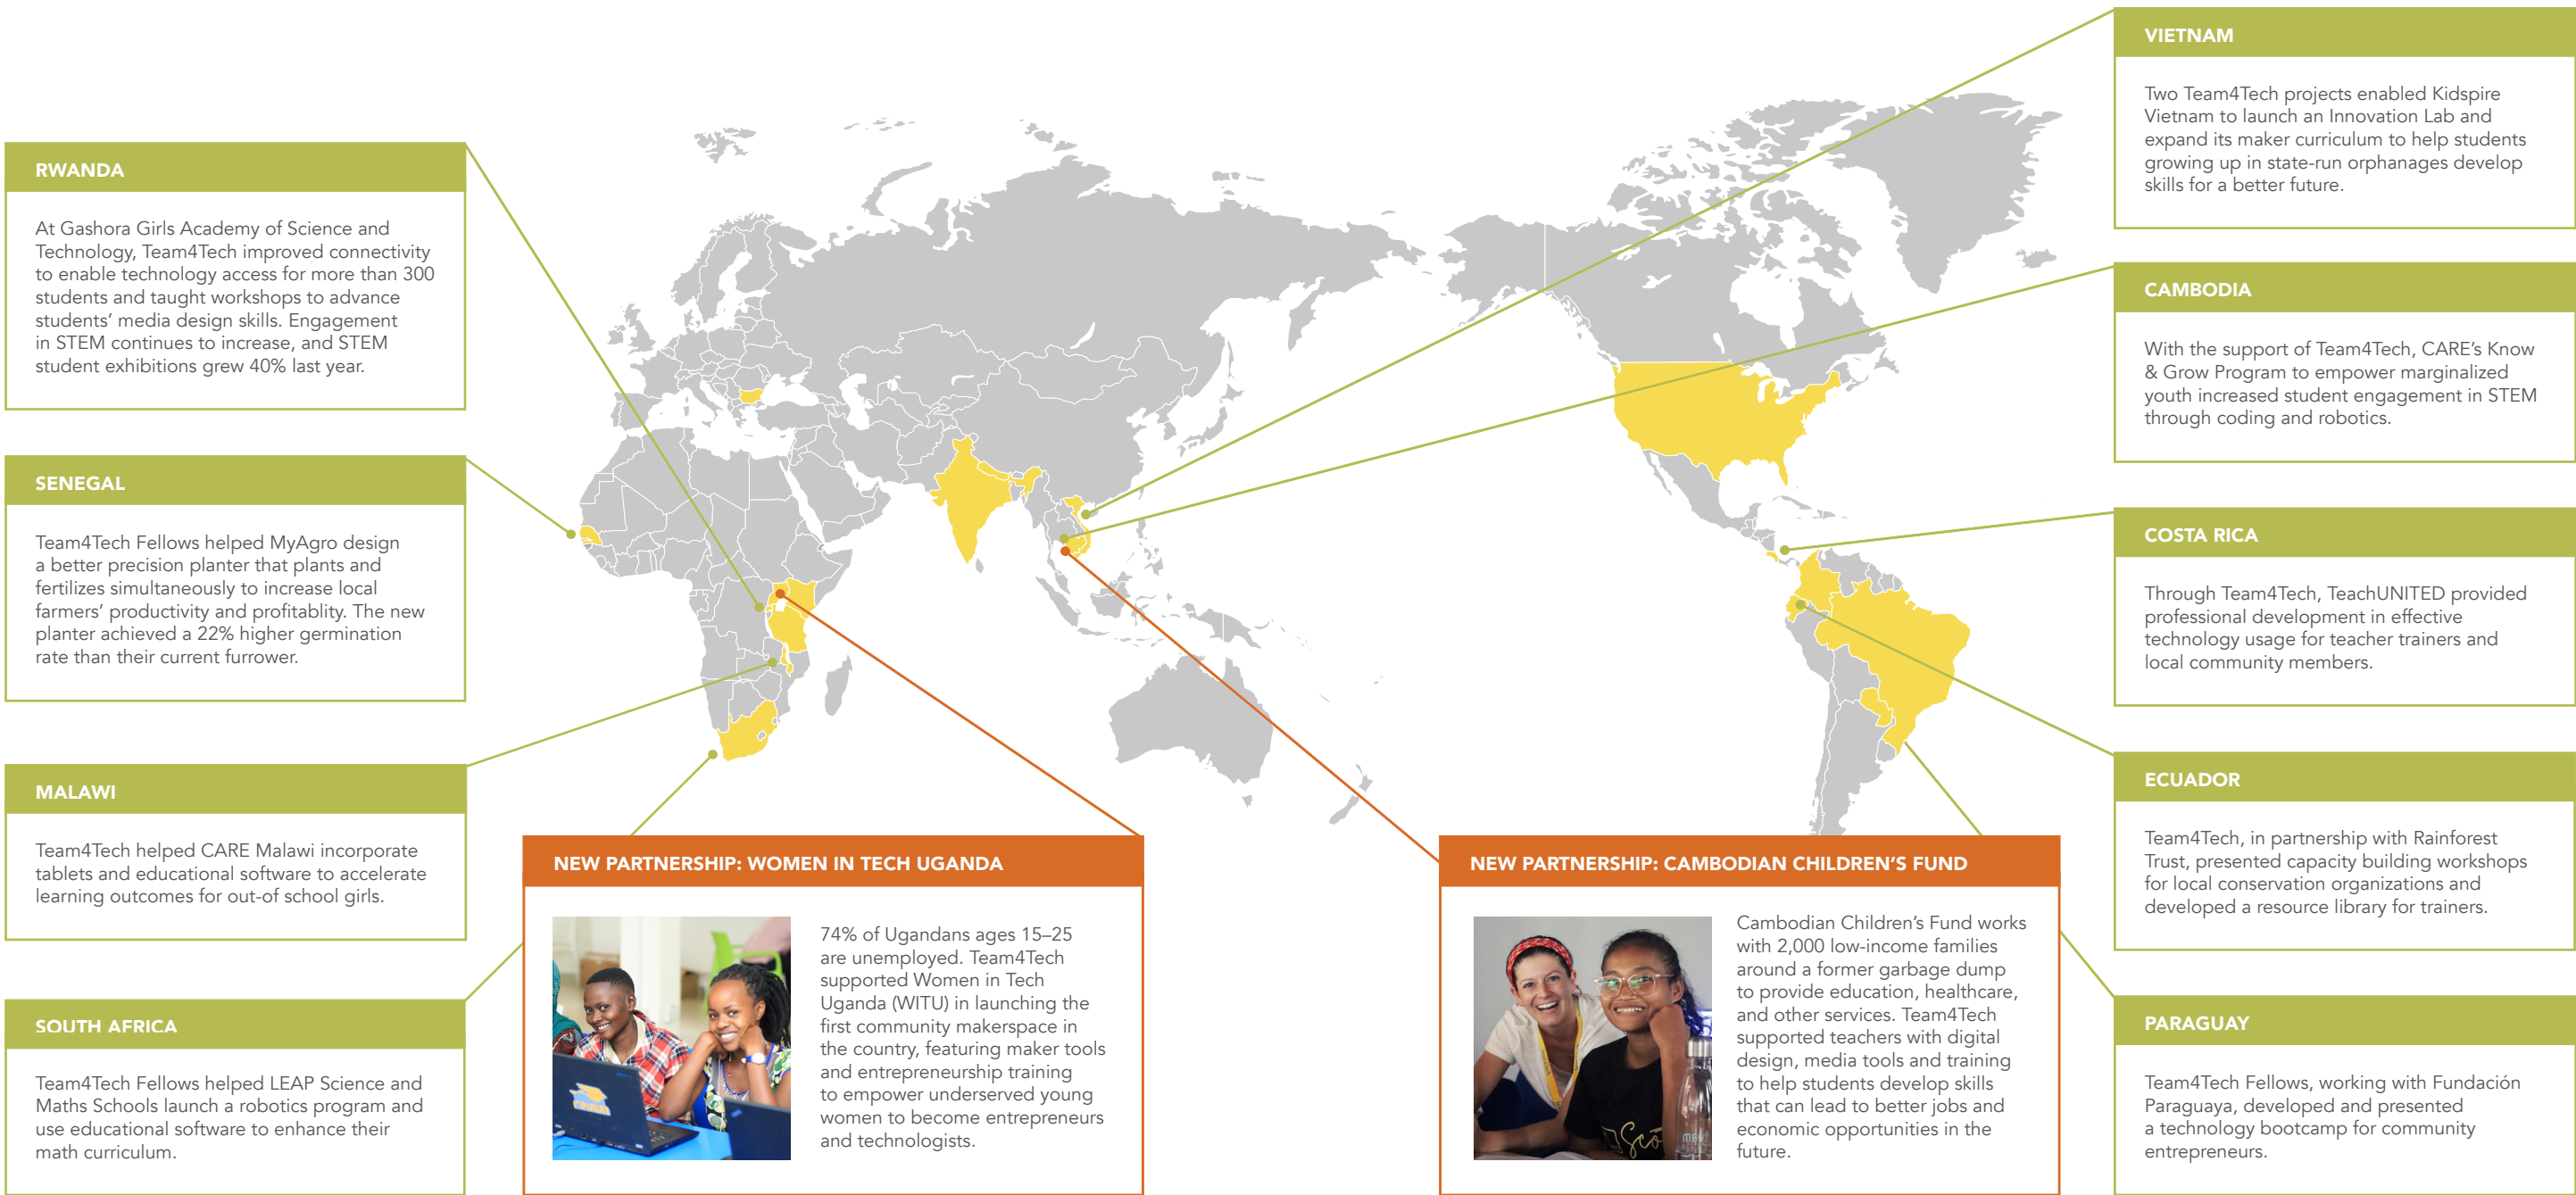

Use project-based learning to promote creative problem solving, critical thinking, collaboration, and entrepreneurship.

TEAM4TECH MAKES A SUSTAINED COMMITMENT TO NONPROFIT PARTNERS THROUGH ONGOING PROJECTS.

Strengthening Educational Capacity: 2019 Project Highlights

Since 2013, our projects have advanced the quality of education for **65,000 learners in 18 countries.**

Empowering Girls Through STEM Education: Case Studies

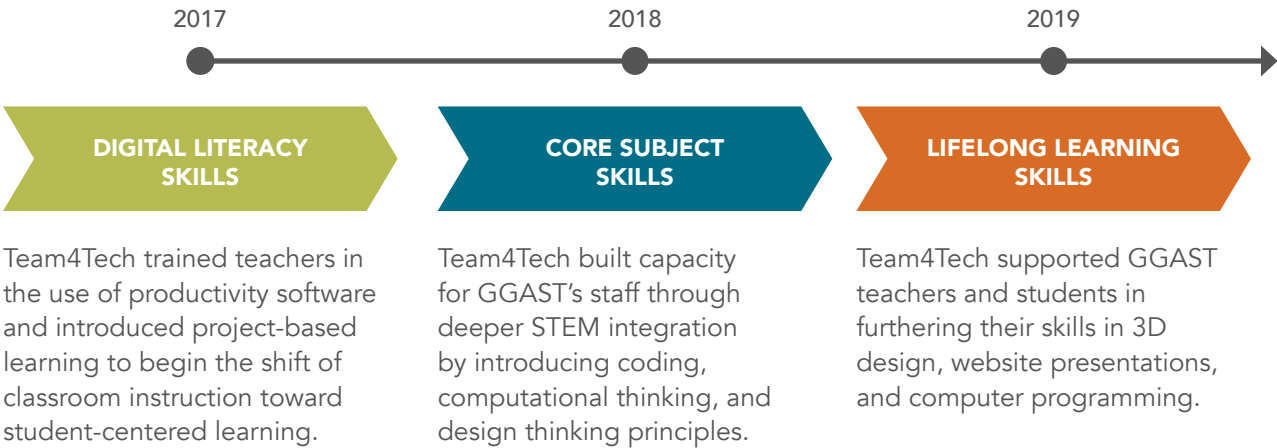

GASHORA GIRLS ACADEMY OF SCIENCE AND TECHNOLOGY

After hearing of a classmate’s police bribery incident, Angela, Monica, and Odile used technology skills to fight back by creating and patenting the AKAPP (Anti Korruption App). Angela shared, “Team4Tech opened our eyes to the influence of technology. The workshops proved to us that technology can help solve the world’s problems.”

In Rwanda, fewer than 34% of girls attend upper secondary school, and only 8% graduate. Gashora Girls Academy of Science and Technology (GGAST) is a “whole girl” STEM-focused secondary boarding school that enrolls a socioeconomically diverse population of girls from across Rwanda, with the goal of preparing them to study at leading universities. In 2019, 100% of Gashora girls passed their National Exams.

GASHORA GIRLS TEAM4TECH PROJECTS

CARE CAMBODIA

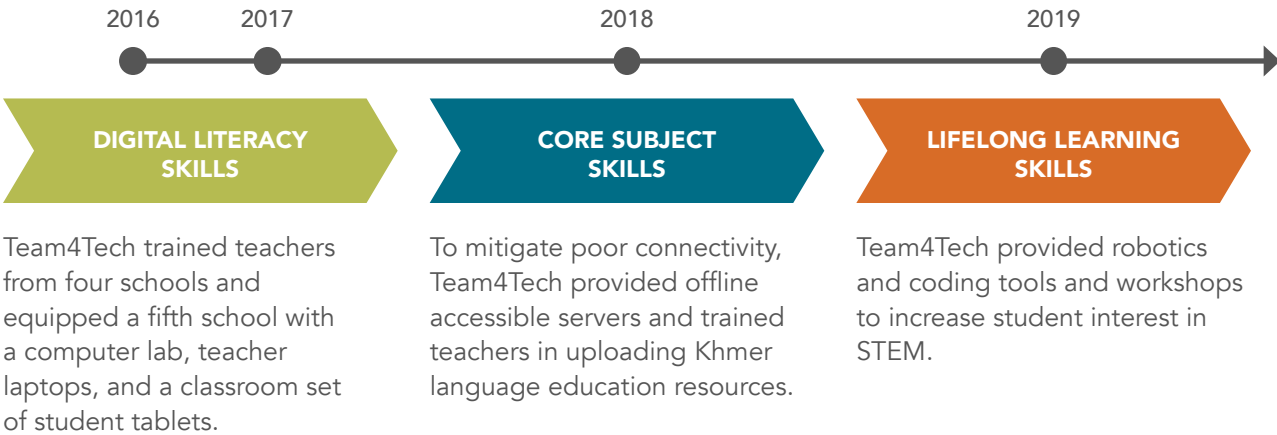

For the last two years, eighth grader Rangsei* has participated in Team4Tech workshops. She loves being able to create using technology and is grateful for the opportunity to learn these skills: “When I am an adult and work hard, I know technology will help get my family and me out of poverty.”

** For the protection of underage learners, a pseudonym has been used.*

Since 2015, CARE Cambodia’s Know and Grow program has worked with nearly 3,000 middle school youth, more than half of whom are marginalized ethnic minorities, to improve education in the rural province of Ratanak Kiri. Team4Tech projects have been a catalyst for integrating technology into these regional schools. CARE Cambodia is now transitioning the program to the Ministry of Education as they plan to scale technology integration into all Cambodian schools by 2025.

Strengthening Local Education Capacity

AFTER PARTICIPATING IN TEAM4TECH TRAINING:

94%

of teachers report
increased technology knowledge and skills
that they can share with their students.

92%

of teachers report
increased productivity
due to improved technology skills, allowing them
more time to focus on student learning.

90%

would
strongly recommend Team4Tech's trainings
to other teachers.

Based on responses from 628 survey participants from 2018–19 projects.

BUILDING EDUCATION CAPACITY IN SOUTH AFRICA

Team4Tech began partnering with LEAP Science and Maths Schools in 2014 to install computer labs and teach digital literacy workshops in their schools in six townships across South Africa. Through annual projects, Team4Tech has supported LEAP teachers and students in advancing their technology skills.

In 2018, Jeremiah Mubaiwa, LEAP's National Director of IT, asked Team4Tech to help LEAP build on that progress by working to launch a robotics program. With the goal of exposing students to STEM career possibilities, Team4Tech Fellows trained students and IT teachers on LEGO robotics kits, which were funded by a Team4Tech technology grant.

In 2019, LEAP launched its first robotics club, which won a bronze medal in its first competition. The team's three Grade 11 students, Kaigso, Sarah, and Dumisani,* learned skills like time management and communications, in addition to the technical skills needed to build and program the robot. They have now begun to share these skills with younger students. Sarah is interested in becoming a mechanical engineer, while Kaigso and Dumisani are considering computer science.

"After the robotics competition, I was inspired to learn more programming. I am also trying to help others learn and have been helping broaden our programming team."

Kaigso*, Grade 11, LEAP Science and Maths Schools

Activating Changemakers: Team4Tech Fellows

Team4Tech Fellows are volunteers from corporate partners who share their professional skills to help local nonprofits build capacity through technology implementation and training. Since 2013, Team4Tech Fellows have contributed more than 65,000 pro bono volunteer hours to benefit 25 nonprofits in 18 countries.

AFTER PARTICIPATING IN TEAM4TECH PROJECTS, FELLOWS CONTINUE TO MAKE AN IMPACT ON LOCAL NONPROFITS.

Team4Tech Fellow Nick Heaton from Cadence Design Systems joined the board of Women in Tech Uganda (WITU) and helped them launch a microloan program for women entrepreneurs.

Team4Tech Fellows from Pure Storage pooled their resources and fundraised so staff from nonprofit Kidspire Vietnam could participate in professional development in the US. They also engaged one of their largest suppliers, Unigen, to provide students with internships to gain valuable career experience.

Madhura Chavan, a Team4Tech Fellow from Autodesk, helped staff from the nonprofit MyAgro continue to develop their human centered design skills by working with the Luma Institute to gain access to additional free training.

"After volunteering, I can vouch firsthand that the Team4Tech experience changes the lives of both participants and partners. Each person gets to build technical and design thinking skills in a diverse environment, gaining creativity and a global mindset in a way beyond the end of the project."

Ben Thompson, Senior Manager of Sustainability and Head of Employee Impact, Autodesk Foundation

OUR CORPORATE PARTNERS:

Team4Tech’s highly efficient operating model delivers nearly **\$20 of impact for each \$1 donated** to the Team4Tech Education Impact Fund.

VALUE OF IMPACT PER PROJECT

*Total value of 1,300 pro bono consulting hours per project using the 2019 CECF/Taproot benchmark of \$155 for mid-level IT professionals.

Financials (July 2018–June 2019)

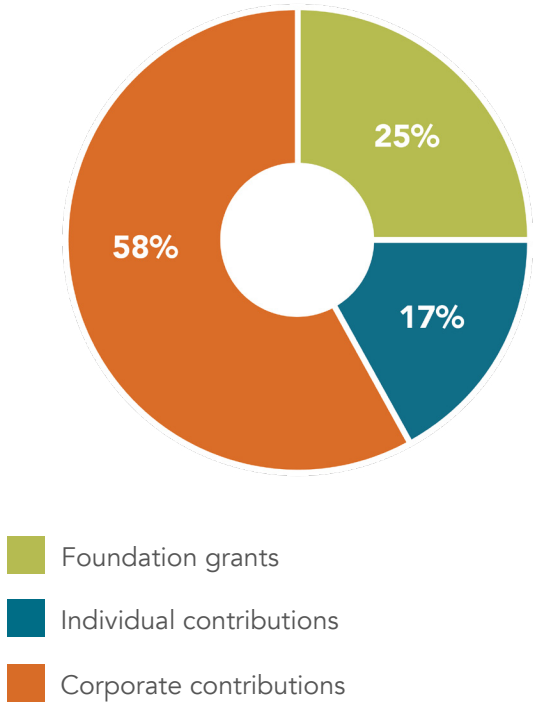

FUNCTIONAL EXPENSES

Total expenses: \$1,084,486

REVENUE SOURCES

Total revenue: \$977,739
